Title: Data Analyst Intern
Location: Singapore
Type: Internship

Job Description:

6Estates was founded by data scientists and tech entrepreneurs to solve real world challenges presented by the explosion of data on different digital platforms.

Building upon years of research on big data analytics from NExT, a research centre established between National University of Singapore (NUS) and Tsinghua University of China, 6Estates develops state-of-the-art tools that can gather, analyse and predict digital signals about organisations, products, brands, people, location and events, to deliver real-time, deep intelligence to businesses to enable critical and time-sensitive decision making on marketing, product development, manufacturing and customer service.

We are now looking for candidates who can communicate, read and write Chinese and love to explore the area of Natural Language Processing.

KEY RESPONSIBILITIES
- Assist Data Scientists on algorithm optimizations
- Assist to annotate and label large amount of data
- Assist to turn Big Data into insights

REQUIREMENTS
- All students are welcomed to apply.
- Computing and/or Stats background is a strong plus
- Interested and knowledgeable in big data technology.
- Team player and meticulous in details
- Fluent in English and Mandarin

About 6Estates:
A commercial spin-off based on award-winning research conducted in the NUS-Tsinghua Centre for Extreme Search, 6Estates is real time digital ethnography company that helps businesses make sense of digital conversations. We have developed state-of-the-art products that can automatically gather, analyze and predict social media signals about organizations, products, brands, people and locations. Our technology has the power to handle live, multimedia and multilingual data streams, all in real-time, automatically. This means businesses will be able to better understand their
