

# 6ESTATES

Title: Software Engineer

Location: Singapore

Type: Full-Time, Permanent

## **Job Description:**

We are looking for the right individual who has the passion and desire to crack the code for this very hot field in AI and Big Data.

6Estates engineers build tools and solutions that ensure the delivery of high quality software for our stakeholders. For someone who wants to learn and grow, this role provides you the unique opportunity to work along with all the experts of different fields.

As a Software Engineer, you will work with team of talents to design and develop our distributed data crawl platform. You will also touch on researching, introducing modern technologies and integrating your amazing innovations and ideas into our production systems.

## **Requirements:**

1. Minimum Bachelor's degree in Computer Science.
2. Excellent implementation skills in Java, Python or C++.
3. Experience with HTML, CSS3 and Javascript is a plus.
4. Proficient in multi-threaded and multi-process programming.
5. Familiarity with Linux IO models.
6. Familiarity with TCP/IP protocol.
7. Fluent in English and Mandarin.
